EX-PARTE QUAYLE ACTION

1. This application is in condition for allowance except for the following formal matters:

Drawings

2. The drawings are objected to because of the following informalities:
reference numeral 18 in Figure 7 lacks the appropriate lead line to show which piece of structure it is intending to designate.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any

portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

3. Claims 1-3 are objected to because of the following informalities:

With respect to claim 1, the claim has several terms which have no proper antecedent basis, such as “the used plate” and “the plate cylinder” in line 3. Additionally, the language in lines 2-4 is awkward and it is suggested that it be amended to use language such as the following to provide more clear claim language: --transfer means (26) for ejecting a used plate (52) outwards from and feeding a new plate (50) to a plate cylinder (16) by respectively rotating the transfer means in normal and opposite rotational directions; --. Additionally, in claim 1, line 6, it appears that the term “new plate (30)” should be --new plate (50)-- since reference numeral 50 has been used to designate the new plate in the specification and drawings. Also, in line 9, it is suggested that the term --a-- be inserted before “transfer path” to provide the appropriate article for the noun and correct the grammatical error.

With respect to claim 3, in line 1, it is suggested that the term --a-- be inserted before “stopper” to provide the appropriate article for the noun.

Additionally, in line 2, it is suggested that the term --the-- be inserted before

“used” since the used plate was previously recited in the claims. Finally, in line 3, it is suggested that the term --an-- be inserted before “ejection” to provide an appropriate article for the noun.

Appropriate correction and/or clarification is required.

Allowable Subject Matter

4. Claims 1-3 are objected to for the reasons set forth above, but would be allowable if rewritten to overcome the objections to the satisfaction of the Examiner.
5. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach or fairly suggest a plate transfer apparatus including all of the structure as recited, in combination with and particularly including, transfer means which rotates in a normal and opposite direction to eject the used plate from the cylinder and feed a new plate to the cylinder in combination with a flat sustaining board provided above the transfer means, the flat sustaining board having one end swingably supported and the other end being branched, in which the branched end swings into a transfer path of the transfer means.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kan et al. (US 2003/0183107 and US 6,792,861)

each teach a plate feeding apparatus having obvious similarities to the claimed subject matter.

7. Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
